**Subject:** Microsoft must not be allowed to do this!

YOU MUST NEVER LET MICROSOFT GET AWAY WITH THIS!!!!!!!!!!!!!! Yes, it would help the schools, but in such a way as to give monopolize the educational market as well in favor of Microsoft!!! With this plan, Microsoft would give schools super-new Wintels or super-old Macintoshes. Because of the fact that the Wintels (backed by Microsoft) would be much more souped up than the Macs, the entire school computer buisness would fall to Microsoft (and I'm sure you can guess why). Passing this new agreement would do just that. Remember Standard Oil? This is just that, for the 20th century-ers.

Just my two cents.
